

## The Brijuni-15 Conference

29<sup>th</sup> - 31<sup>st</sup> August, 2022

### Deep Space Communication, Navigation and Propulsion

with Special Session

### Lightsails Propulsion for Solar System and Interstellar Voyages

The long tradition of Brijuni conferences, dating since 1986, has been sadly interrupted by the pandemic conditions in the World, but we are in the game again.

The basic motto of the Brijuni Conferences is to stimulate the cross-disciplinary flow of science, technology and marketing the fallouts for advancing space exploration by mankind. The topic of the conference is to discuss some of the major challenges

confronting Space travel and at the heart are communication, navigation, and propulsion. New ideas that meet these challenges shall be discussed and the talks will be stimulating enough to achieve that goal, on the edge between imagination and real Universe as we know it today. Tranquillity of beautiful nature of the National Park Brijuni is an ideal catalyst that inspires this. The Park is situated near the city of Pula and represents the only National Park in Istria County. There is a rich cultural ancestry of the islands from the earliest to modern times and out of the Conference hours there will be enough time to visit.

The Conference venue is in the hotel Istra, which is next to hotel Neptun. The third available hotel is Carmen, about 100 m away. Besides these three hotels there is no other accommodation on the island. There is **no conference fee**. Each delegate will be responsible for its own hotel booking. The contacts are given below.

For all hotel bookings and information please contact Flores Maršetić ([flores.marsetic@np-brijuni.hr](mailto:flores.marsetic@np-brijuni.hr), tel: +385 52 525914) or use the [booking.com](https://www.booking.com) website (**please indicate that you attend the Brijuni Conference**).

All other information is available in the Conference web page [www.brijuni-conference.irb.hr](http://www.brijuni-conference.irb.hr) which will be updated on the daily basis with the latest data.
